

Eros

Direct and indirect linear sytem

LUMEN
WARM

Eros

up and down

The linear system offers a lumen package range from 300lm/ft to 1100lm/ft with an industry leading efficiency of up to 142lm/W.

Its smart conception also makes it super easy to install in all kinds of situations.

Eros

G5 direct + Batwing indirect

The Eros conception lets you create long linear runs to appropriately light up the space it is installed in.

Custom lengths and patterns are also possible, with the 90° lit corners, to create the square or rectangle configuration you are looking for!

Eros

G5 direct + batwing indirect

A wide variety of combinable optics are at your disposal to carefully conceive the lighting design that is the most appropriate for the room.

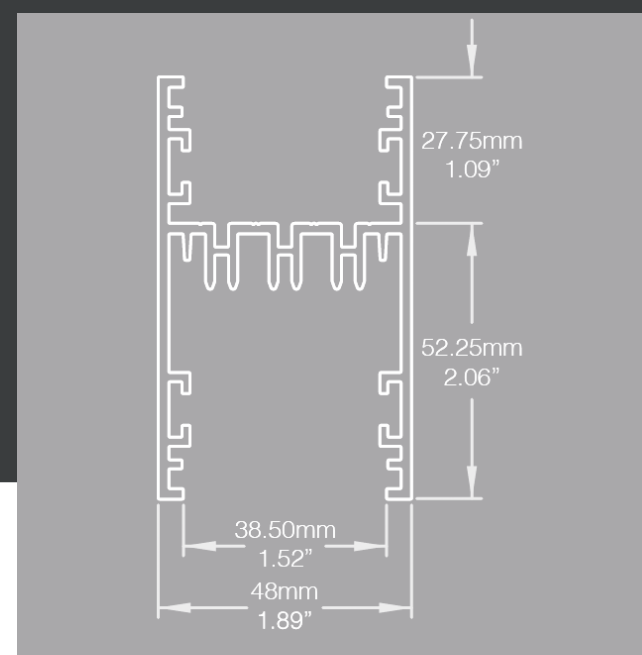

Use the batwing lens to widen your beam, one of the downlights to add a touch of design and accent or combine both to create the unique luminaire you are looking for.
